libero - the free one

The Libero[®] is an extremely solid* foosball table with all of the characteristics of a professional tournament table.

Its sophisticated design and technical innovations ensure that it is a delight to play. It is distinguished by its use of high quality materials in its precise, handmade structure.

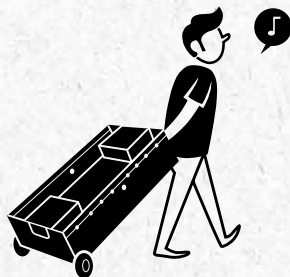

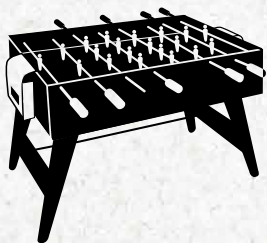

“Libero” is Latin for “the free one”. Like everything from flix it is flixible. It only takes 3 minutes to convert the Libero into a box on wheels that is small enough to fit into the boot of your car to take to the next party. The folded up Libero fits into the tiniest of spaces without being in the way.

The Libero is the official tournament table of the German Bundesliga-Club “Roter Stern Bremen”, and the table of the second best player in the world.

“so long as a man can play, he is free” friedrich sieburg

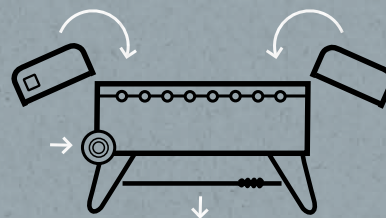

here today, there tomorrow

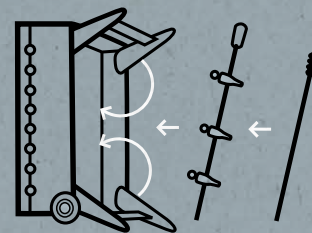

Away it goes! Everything can be packed up in only 3 minutes.

01. Open the folding doors and take out the players. Close the folding doors again.

02. Fold the goal boxes into the playing field. Attach the wheels, detach the fixing rod and remove it.

03. Lift the Libero up onto its wheels. Stow the rods away under the playing field. Secure the legs with the fixing rod for secure transportation. Off you go!

kicker to go

the libero is available in three models

libero:

The goal box is made of solid hardwood multiplex.
This gives the Libero an elegant and classical appearance.

libero sport:

The smaller goal box is made of brushed aluminium to focus on functionality. The Libero Sport is both pure fun and a sports machine.

libero home:

Doesn't include folding doors for taking out the players. The Libero Home is less mobile but has a beautiful, minimalist appearance.
